

DDB系列多点电动润滑泵

DDB series multi-point electric lubricating pump

● 应用范围 Scope of application

DDB series multi-point dry oil pump is suitable for the lubrication frequency is extremely low, the lubrication point does not exceed 50 points, the nominal pressure is 10MPa multi-line dry oil centralized lubrication system, it is suitable for crusher, forging machine tool, dock crane, printing machine and other small single-machine equipment. It can supply grease to every lubrication point directly or through single-wire oil feeder.

● 技术参数 Technical Data (符合JB/ZQ4088标准 Comply with JB/ZQ4088 standard)

Model	Number of oil outlets(points)	Nominal pressure	The amount of fuel given each time	Oil feeding times	Reservoir capacity	Power	Weight
DDB-10	10	10Mpa	0~0.2ml/次 (ml/times)	13次/min (times/min)	7L	0. 37Kw	19Kg
DDB-18	18				23L	0. 55Kw	75Kg
DDB-36	36						80Kg
The Suitable medium is grease (NLGI0 #~2 #) with penetration not less than 265(25 °C, 150g) 1/10mm, and the working environment temperature is 0°C~+80°C.
